Policy for the Protection of the Seas and Aquatic Spaces

FMIPH cares to do its part in protecting aquatic areas in order to leave a better world for future generations. Oceans, rivers and watersheds, which make up a large part of the world's ecosystem, directly or indirectly affect people closely. FMIPH policy on the protection of seas and aquatic areas covers the following issues:

- Trainings on aquatic ecosystem protection and sustainable fishing to local, regional or national stakeholders proposes and implements.
- It organizes/supports activities on the protection and sustainability of the aquatic ecosystem and takes actions on these issues.
- disposal practices in order to protect the water quality and ecosystem and thus prevent potential harm to the environment .
- It does the necessary work for the protection of the local ecosystem.
- - to protect Aral sea region from extinction

FMIPH has made important studies at the local level on the protection of seas and water basins. It will continue to work in the next period and will continue to work to take a role both nationally and globally.
